Abstract:

The Purpose of the study was to analyze the effect of Value Orientation factors on International Hand Ball Player "Indu Gupta". Value orientation was assessed by Value Orientation scale, constructed and standardized by N.S. Chouhan, Dr. Saroj Aurora and Dr. Madhu Mathur. The Present Scale measures Six Dichotomies areas of Value orientations and is by nature, Non Projective Since then, it has been profusely used in doctoral researches. The Scale measures 'Localism vs Cosmopolitanism' Fatalism vs Scienticism, 'Non-Venturesomeness Vs Venturesomeness' 'Non Empathy' Vs Empathy, Autocratic Vs Democracies' and Traditions' vs Progressivism.

Keywords: Orientation Factors & International Player Indu Gupta

Introduction:

The sportsman's personality in the sense that it depends on many psychological factors like self Confidence, emotional intelligence Level of aspirations, achievement motivation, emotions, mental endurance, Value Orientations, Locus of control and Self esteem.

There are many problems, but one complex and mysterious problem which is faced by the human being since long has been the mystery of his own and other nature and personality, Human being appear in different shapes and sizes and behave in highly complex ways. Several craves of people are living on the earth. But of them no two people are exactly alike. It is difficult to conjecture what is the human nature of these people. To understand Human nature and personality of persons Psychologists are continuously striving.

It is very important for any human enterprise, more so in case of sports and games, where there is not only kaleidoscopic play of emotions but also name, fame, money and much more at stake. A Comprehensive understanding of Human nature would contribute in great measure for the all round development of the person. Sporting activity and also improving the quality of life. Soloman, et. al. (1995) in this study, researchers examined the educational value orientations of Physical education pre-service teachers in an elementary methods course, investigating the link between value profiles and teachers behaviors. Data from the value orientation inventory indicated that subjects entered school with defined value profiles, but priorities within completing value orientations fluctuated over the semester.

Social value orientation also referred to as social motives. Social values or value orientation's is a social psychology motivational theory of choice behavior in game situations advanced by **M. Messick and Charles. G. McClintock in 1968**. Unlike the traditional rational choice theory in mainstream economic, which assumes that all individuals make choices that maximize their own payoffs in social dilemma situations social value and orientations consider personality differences across individuals which leads to a range of PA References for one's own well being and the well being of other.

Objective of the Study:

To find out the level of value orientation of International Hand Ball Player "Indu Gupta".

Hypotheses:

Indu Gupta would have High level of value orientation.
